Publication date: May 2021

Critical energy is fugitive. It confronts and destabilises, grants no pause or respite. Critique has the potential to concentrate and materialise it in the form of an artistic practice. The edited volume *Big Critical Energy* bundles the energy that circulates in the Master's in Critical Studies at the Academy of Fine Arts Vienna. It gathers students, tutors and alumni of the programme in one book. Their contributions trace the conditions and intentions with which artistic and theoretical scholarly research is conducted.
